Overview

I am a versatile software developer and data scientist with a strong foundation in programming, statistical modelling and cybersecurity. Currently pursuing advanced studies in statistics and programming, I leverage Python, R, SQL and web technologies to build data-driven solutions and secure applications. My experience includes an internship in data analysis at AMREC, the launch of a web platform via my startup *lynqIQ*, and hands-on work in ethical hacking and network security. I thrive at the intersection of code, data and protection.

Education

- **Bachelor of Science in Statistics and Programming**
Mama Ngina University College
Expected Graduation: December 2027
- **Mentorship Completion**
AMREC Consultants
Completed a comprehensive mentorship program focused on data analysis, research methods, and practical applications of statistical and programming knowledge.
- **Ethical Hacking and Cybersecurity Training**
Hack The Box Academy
Completed training in ethical hacking practices, emphasizing safe, ethical methods for identifying and addressing security vulnerabilities.

Skills

Technical Skills

- **Programming & Data Science:** Python, R, SQL, JavaScript; Pandas, NumPy, Matplotlib, Seaborn.
- **Machine Learning & AI:** scikit-learn, TensorFlow, Keras.
- **Web Development:** HTML, CSS, JavaScript, React, Django, Node.js.
- **Cybersecurity & Ethical Hacking:** Penetration testing, vulnerability assessment, network security fundamentals.

Additional Skills

- **Project Management:** Led the planning, development and launch of a social-network platform, coordinating timelines, team tasks and user engagements.
- **Virtual Assistance:** Proficient in offering support for data analysis, programming, and software engineering tasks.
- **Communication and Teamwork:** Experienced in collaborating with cross-functional teams to achieve project objectives.

Professional Experience

- **Data Science Mentee**
AMREC Consultants
May 2024 – August 2024
 - Built and validated a predictive regression model (scikit-learn) that forecasted client marketing spend with an accuracy improvement of 12%.
 - Created interactive dashboards (Tableau / Seaborn) to visualize KPI trends for senior stakeholders, reducing decision-making time by 20%.
 - Partnered with the research wing to interpret statistical outcomes and deliver actionable insights, producing a 3-page summary report for management every fortnight.

- **Junior Data Scientist & Analyst Mentee**

AMREC Consultants

May 2025 – August 2025

- Developed a regression model that improved forecasting accuracy by 12% for client marketing spend.
- Created interactive dashboards with Tableau and Seaborn to visualize KPI trends, reducing decision time by 20%.
- Collaborated with the research team to translate statistical findings into actionable business recommendations.

Notable Project

- **COVID-19 Deaths Analysis (Kaggle)**

Performed exploratory data analysis on global COVID-19 mortality data using Python, identifying trends, patterns, and country-level differences in death rates.
